WORK EXPERIENCE

Application Developer – Jarvis at CIBC | June – Now | Toronto, ON

Currently maintaining and developing APIs written in Java with Spring Boot and ETL Jobs with Spark Scala. Working on frontend projects with Angular 10.

Full Stack Developer – BlackBook | May – June | Brazil - Remote

Developed APIs with NodeJS, ExpressJS, and MongoDB. Created containers with Docker and Kubernetes. Created pipelines and deployed on Amazon ECS and EC2. Developed front-end UI with React.

Peer Tutor and Freelancer Software Developer | April 2020 – Now | Toronto, ON, Canada

I am currently teaching software development students and professionals from diverse cultural backgrounds as a peer tutor for Python, C++, JavaScript, NodeJS, Angular, React, SQL, NoSQL (MongoDB), and Java language in a remote setting.

Allo delivery app – Software Developer | April 2020 – December 2020 | Toronto, ON, Canada

Responsible for creating web pages with Vue from Figma designs and creating pipelines with Docker, Kubernetes, GitHub Actions and AWS.

Seneca College – Peer Tutor | January 2020 – June 2020 | Toronto, ON, Canada

Served as a peer tutor for C and C++ Programming courses and Introduction to Linux for students. Tutored both in a local setting as in a remote.

Eleva Guindastes (Crane Rental) - Administrator and IT manager | 2014 – 2019 - Brazil

Worked as a business manager, created and used customized Excel sheets and MySQL database, oversaw day-to-day operations, dealing with customers, projects, and strategic decisions. Maintained the company website with JavaScript, HTML, CSS, and Bootstrap using templates. I excelled at Google Ads and Facebook Ads creating marketing campaigns using Corel Draw and Adobe Photoshop.
